

WordPress site speed cheat sheet

An accompanying bonus to [Become a WordPress Master](#), a free seven-day email course which teaches you how to do everything with WordPress, yourself.

Below you'll find a list of all the tools you need to make your WordPress site really fast.

For testing your site:

- [Pingdom Tools](#) for testing load times.
- [P3](#) for seeing which plugins slow your site.

For caching your site:

- [WP Super Cache](#) for all your caching needs.
- [WP Rocket](#) - premium caching plugin (superior performance to *Super Cache* but it's relatively marginal).

For optimizing your site:

- [Autoptimize](#) for minifying your CSS and JS.
- [Remove Query Strings From Static Resources](#) for, well, it says on the tin.
- [CSS Sprite for Google PageSpeed](#) for CSS sprites.

And that's it!
